Beijing new airport is under construction.

2019

China International Elevator Exhibition

Langfang · Beijing
23-26 April 2019

Introduction

China International Elevator Exhibition 2019 will be held in Beijing-Langfang. This city, as the core of the Beijing-Tianjin-Hebei integration, is located between Beijing and Tianjin and has a unique regional advantage. The developed transportation network makes Langfang more closer to the outside world. The new Beijing airport, which is due to be completed as a super-engineering project, is giving wings to Langfang's takeoff, and the creation of Xiong'an New Area, which will allow Langfang to truly enter the fast track of development. By holding an elevator exhibition in Langfang, it will undoubtedly put the exhibitors at the forefront of the national development, exploring more business opportunities and finding the best partners in the context of the Beijing-Tianjin-Hebei integration. Looking forward to the elite of the elevator industry, which will converge in Langfang in 2019!

The total exhibition area of China International Elevator Exhibition 2019 is expected to be about 50000m². We will show the advancing products and technology, arrange various fascinating activities and make booths unique to jointly present a feast of the elevator industry for visitors! Looking forward to your participation!
